# CREATE WEB EXPERIENCES USING ADOBE EXPERIENCE MANAGER V6.X

## Summary

Create Web Experiences Using Adobe Experience Manager v6.x (formerly known as AEM Sites: Author) is a two-day instructor-led (classroom and virtual) course, where you will learn authoring concepts using the Adobe Experience Manager Touch UI. This course will cover creating and editing web pages, and responsive web pages based on different templates along with hands-on exercises. Participants will learn the importance of using workflows and launches, as well as personalization and targeting. This course is suitable for content authors.

**Note:** Adobe Experience Manager v6.x supports both 6.0 and 6.1 product versions

## Outline

### I. Exploring Adobe Experience Manager Touch UI

- List the key elements of Touch UI
- Explain different Touch UI consoles
- List the key interface elements of a page

### II. Using Basic Authoring Features

- Define key terminology used in Adobe Experience Manager
- Create and edit pages
- Create, edit, and preview responsive pages
- View and edit bulk page properties
- Create and upload assets
