INSTALLATION

Overview

4Point is the industry leading expert on Adobe enterprise products. We have installed thousands of solutions leveraging Adobe technology. Our team of experts have the depth to install and configure Adobe Experience Manager (AEM) forms on JEE in the client's enterprise environment with the standard configuration prescribed by AEM forms for JEE install documentation.

Installation

4Point will undertake the Installation of AEM forms on JEE on the client's server. The installation will include the configuration of the AEM forms on JEE foundation and service components of the platform. These will include:

- Installation on a dedicated physical server or virtual host environment (supported virtualized environments are: VMWare ESX 3.0, 4.0, and VMWare ESXi 5.0);
- AEM forms for JEE configuration with a supported Relational Database Management (RDBMS);
- Installation of the Reader Extensions Certificate (if applicable)
- AEM forms for JEE configuration with supported Active Directory/LDAP (if applicable)
- AEM forms for JEE configuration with supported e-Mail System (if applicable)
- Security Hardening for AEM forms on JEE.
